

20-23 MAY, 2026

**Bold Ideas. Big Systems.
One Health**

About the Summit

Welcome to Milan Longevity Summit 2026 at Allianz MiCo.

The Milan Longevity Summit 2026 is a global platform exploring how the systems that shape our lives, health, science, food, technology, finance, cities, education, and culture, can evolve to support healthier, more resilient futures.

Over four days, the Summit brings together scientists, institutions, policymakers, entrepreneurs, investors, creatives, and industry leaders for cross-sector dialogue, collaboration, and systems thinking.

Built around the vision of One Health, the programme explores the interconnected relationship between human health, planetary wellbeing, and economic resilience. Across four stages and twelve interconnected sectors, the Summit examines how innovation, governance, research, infrastructure, and culture can contribute to long-term wellbeing and societal resilience.

From longevity science and preventive medicine to regenerative economies, AI, food systems, mental health, urban design, and the future of work, the Milan Longevity Summit is designed to connect disciplines, industries, and perspectives through a shared conversation about the future of life on this planet.

Because longevity is not only about living longer.

It is about designing systems capable of sustaining life, for people, society, and the planet, over time.

The Summit at a Glance

4 DAYS

Understanding today's systems and imagining what comes next

4 STAGES

LONGEVITY · PROSPERITY · VITALITY · HUMANITY

12 SECTORS

Health & Life Sciences · Agrifood · Tech & AI · Infrastructure & Cities · Economy · Media, Culture & Leisure · Education, Work & Learning · Circularity & Bioeconomy · Planetary Health · Consumer Innovation · Retail · Mental Health & Wellbeing

300+ SPEAKERS

Science · Policy · Industry · Economy · Creativity

ONE HEALTH

Connecting human, planetary, and societal wellbeing

BUSINESS MATCHING

Curated meetings and cross-sector collaboration

INNOVATION EXPO

Startups, technologies, and emerging solutions

CITY-WIDE ACTIVATIONS

Experiences and events across Milan

U
S

The Venue & Experience

The Summit takes place across multiple stages, networking areas, and activation spaces designed to encourage movement, discovery, and connection throughout the venue.

Use the map to navigate:

- Our stages
- Registration & accreditation
- Innovation Expo
- Business Matching Area
- VIP Lounge
- Networking & food area
- Partner activations
- Media & press
- Restrooms and venue services

There is no single path through the Summit.

Move across stages, follow connections, and build your own journey through the conversations shaping the future of health, society, and long-term resilience.

For the latest programme updates and live information, scan the QR code or visit:

A Heartfelt Thank You

The Milan Longevity Summit exists thanks to an extraordinary community of people who believe in the possibility of building healthier and more resilient futures.

Our deepest gratitude goes to our Scientific Committee, speakers, partners, institutions, advisors, moderators, volunteers, and team members whose expertise, generosity, and dedication made this Summit possible.

Most importantly, thank you to everyone joining us in Milan. We hope these days spark new ideas, meaningful connections, and collaborations that continue long after the Summit ends.

With gratitude,
The Milan Longevity Summit Team

Scientific Committee

The Scientific Committee supports the scientific direction of the Milan Longevity Summit, helping shape a programme grounded in rigorous research, clinical relevance, and interdisciplinary dialogue.

Its members bring expertise across longevity science, medicine, neuroscience, prevention, nutrition, and health research, contributing to conversations exploring the future of human health, ageing, and wellbeing.

Members

- Alberto Beretta, Chair
- Maria Pia Abbracchio, Co-Chair
- Nir Barzilai, Albert Einstein, New York, USA
- Juan Carlos Belmonte, Altos Lab, Los Angeles, USA
- Francesco Billari, Bocconi University, Milano, Italy
- Anna Erat, University of St Gallen Executive School, Switzerland
- Claudio Franceschi, University of Bologna, Italy
- Nicola Palmarini, National Institute of Ageing, Newcastle, UK
- Daniela Perani, Vita e Salute San Raffaele University, Milano, Italy
- Camillo Ricordi – Diabetes Research Institute, Miami, USA
- Antonella Santuccione Chadha, Women's Brain Foundation, Zurich, Switzerland
- Vittorio Sebastiano, University of California, Los Angeles, USA

THANK YOU

Our Team

Behind the Milan Longevity Summit is a multidisciplinary team working across strategy, science, partnerships, production, communications, design, operations, and community building, united by the ambition of creating a platform capable of connecting disciplines, industries, and perspectives through a shared conversation about the future of health and society.

Over the past months, this Summit has been built through countless conversations, collaborations, late nights, challenges, and moments of inspiration. What you will experience over these days is the result of an extraordinary collective effort driven by passion, curiosity, and care.

To every speaker, partner, institution, volunteer, collaborator, advisor, and member of the team: thank you for helping bring this vision to life.

And to everyone joining us in Milan, thank you for being part of this journey. We hope these days spark new connections, unexpected ideas, and conversations that continue long after the Summit ends.

With gratitude,
 Sharon Cittone

The Program

Four Days. Four Lenses. One System.

The Milan Longevity Summit 2026 is designed as a journey across systems.

Longevity is not only about living longer, it is the result of how well our systems function over time: health, food, cities, capital, technology, and society.

Over four days, the program moves from understanding today's challenges to shaping the systems of tomorrow:

Day 1: Orientation & Common Ground

Where we are, and why change is needed

Day 2: Redesigning Systems

New frameworks, incentives, and models

Day 3: Scaling the Systems

Infrastructure for real-world transformation

Day 4: The Future We Want

Long-term visions, values, and next generations

HOW TO NAVIGATE

Sessions are organized across four color-coded stages.

Follow one track, or move across them to build your own journey.

PROSPERITY

Policy, governance, economy and capital

Exploring the systems, incentives, and financial models shaping long-term resilience.

VITALITY

Innovation & market transformation

Startups, industry, and investment scaling solutions across interconnected sectors.

HUMANITY

People, culture and society

Mental health, education, creativity, and social systems, exploring how we live, work, and connect.

LONGEVITY

The foundations of health, science and research

Research, biology, and clinical insights shaping longevity and healthspan.
From discovery to real-world application.

BUILD YOUR PATH

There is no single way to experience the Summit.

Move across stages. Follow connections.

The most valuable insights happen at the intersections.

One Health is not one discipline; it's how everything works together.

Select your day and stage colour to jump straight to the program

23 MAY

PROGRAM

Innovation District

The Innovation District brings together startups, technologies, investors, research organisations, corporates, and ecosystem partners working at the forefront of health, longevity, food systems, AI, sustainability, finance, consumer wellbeing, and systems innovation.

Designed as a dynamic space for discovery, collaboration, and real-world exchange, the area combines the Innovation Expo, Innovation Stage, workshops, business matching, and interactive formats across three days of programming.

Throughout the Summit, Innovation Arena's stage partners will host pitch competitions, workshops, innovation challenges, showcases, and curated conversations exploring how emerging technologies and new business models can contribute to healthier, more resilient futures.

From early-stage startups to established innovators, the Innovation District highlights the people and ideas helping shape the next generation of solutions across interconnected sectors.

We invite you to explore, connect, discover new collaborations, and engage with the innovators building what comes next.

Innovation Stage

Panels, pitch competitions, firesides, workshops, and live programming

Innovation Expo

Startup booths, technology showcases, and partner activations

Change For Good Lounge Powered by Fineco

Workshops, challenge sessions, presentations, networking moments, informal meetings, lounge spaces, and interactive discussions designed for exchange, collaboration, and community building throughout the Summit.

Business Matching

Curated meetings between startups, investors, corporates, institutions, and ecosystem partners

Partner Activation

Experiences, showcases, and branded activations throughout the Innovation District

BUILD YOUR PATH

Select your day and stage colour to jump straight to the program

THE INNOVATION DISTRICT

A space dedicated to emerging ideas, breakthrough startups, live challenges, workshops, conversations, and collaborative formats designed to connect innovation with real-world systems transformation.

From pitch competitions and industry showcases to hands-on workshops and cross-sector dialogues, the Innovation Arena highlights the people, technologies, and solutions shaping the future of health, finance, food, AI, and society.

14:30-15:30

FINECO SPACE

DEEP DIVE WITH JOHN FULLERTON

An intimate conversation with John Fullerton exploring regenerative economics, systems thinking, and the structural shifts needed to build long-term resilience across finance, business, society, and planetary systems.

The session will also feature the presentation of his new book, *Regenerative Economics: Revolutionary Thinking for the World in Crisis*, which reimagines the economy as a living system capable of evolving beyond extractive models toward healthier relationships between people, capital, and the planet.

Drawing from science, ecology, and systems thinking, the book examines the roots of today's interconnected crises, from climate change and biodiversity loss to growing inequality, while proposing a regenerative framework designed to support long-term human and planetary wellbeing.

Presented in an interactive workshop and discussion format designed to encourage deeper dialogue, reflection, and audience exchange.

14:30-17:30

INNOVATION ARENA

STARTUP PITCH COMPETITION - DAY 1

Across three days, selected startups from around the world take the stage to present breakthrough ideas and emerging solutions shaping the future of health, food systems, AI, finance, sustainability, consumer wellbeing, and planetary resilience.

The competition brings together founders, investors, corporates, institutions, and ecosystem leaders in a dynamic format designed to spotlight innovation with the potential to drive meaningful systems transformation.

From early-stage technologies to scalable market solutions, the Startup Pitch Competition highlights a new generation of entrepreneurs building the tools, platforms, and models shaping healthier and more resilient futures.

THE INNOVATION DISTRICT

A space dedicated to emerging ideas, breakthrough startups, live challenges, workshops, conversations, and collaborative formats designed to connect innovation with real-world systems transformation.

From pitch competitions and industry showcases to hands-on workshops and cross-sector dialogues, the Innovation Arena highlights the people, technologies, and solutions shaping the future of health, finance, food, AI, and society.

9:30-10:30 INNOVATION STAGE INDUSTRY PANEL

A cross-sector conversation exploring how innovation, investment, and emerging technologies are reshaping the systems that support health, resilience, and quality of life over time.

Powered by Virgin

10:30-11:30 INNOVATION STAGE THE WELLBEING GENERATION CHALLENGE LAUNCH

Launch of the innovation challenge exploring "The Invisible Cost of Longevity" powered by Startupboot Camp and Feat inviting startups, innovators, and multidisciplinary teams to rethink the future of financial resilience and long-term wellbeing.

Powered by Fineco, STB & Feat

11:30-17:30 FINECO SPACE INNOVATION CHALLENGE: THE WELLBEING GENERATION

A collaborative innovation sprint bringing together startups, experts, and ecosystem partners to develop new ideas and practical solutions at the intersection of finance, longevity, and future sustainability.

Powered by Fineco, SBC & Feat

14:30-17:30 INNOVATION ARENA STARTUP PITCH COMPETITION - DAY 2

The second round of startup pitches continues with founders presenting scalable solutions addressing the future of health, food, climate resilience, technology, and consumer wellbeing.

Youth Takeover

On the final day of the Milan Longevity Summit, the stage shifts.

Not as a symbolic gesture, but as a deliberate transition of voice, perspective, and responsibility.

Youth Takeover is where the next generation steps forward, not as future leaders, but as present system shapers. A space where young founders, researchers, creators, and changemakers bring forward new ways of thinking about health, society, and the planet. Not constrained by legacy models, but informed by urgency, creativity, and lived experience.

Across sessions, dialogues, and open exchanges, this is a moment to challenge assumptions, reframe priorities, and ask different questions:

What does it mean to design systems for a 100-year life?

What kind of world are we building, and who is it truly built for?

What are we not seeing because we are too close to the way things have always been done?

From food systems to mental health, from education to technology, Youth Takeover connects ideas with action, bridging generations in a conversation that is as much about listening as it is about leading.

**Because the future is not something to prepare them for.
It is something they are already building.**

Stay tuned for the full youth takeover program
